Referral Reward Program

"Bring a friend" Botox Referral Reward

Dear Valued Patient and Friend,

Welcome to another edition of our Looking Good Feeling Good™ newsletter. I hope you're finding some fabulous tips to making your life healthier and happier. And if you want to share these tips with someone who could benefit from them, please call our office so we can start their subscription.

Inside this issue you're sure to find something you can use right away, so let's start with...

We will pay you to do your homework!!

For over 16 years, Dr. Felice has worked tirelessly to expand his scope of practice and become a leading provider of cosmetic services, featuring a fully accredited in-office operating facility, that was added nearly 10 years ago. The safety record over that period of time has been superior and patients have truly enjoyed the privacy. Since 1994, fourteen different lasers have been added and exchanged as new technologies have proven better. This is the commitment that Dr. Felice has made to his patients. He will always strive to provide the most current, effective and safe equipment for a variety of needs.

We are often asked if one day a tunnel will be available to go in one end and come out the other end completely rejuvenated. We feel that the tunnel is here and starts at our front door.

Included in this newsletter is a "**Comparison Chart**" that lists the variety of services available at Youthful Images. Dr. Felice feels so confident that there is no other facility in the Greater Hartford area that offers this variety of alternatives that he will award a \$500 gift certificate for use toward any non-surgical service to anyone who can prove that an equal facility exists.

Your Skin may reflect what your body is doing

The skin may be telling us of other problems that may be occurring within. This is why at Youthful Images we feel that every patient should be evaluated by the physician before undergoing any treatment.

Rashes, eczema, dryness can all be associated with nutritional deficiencies. For example, someone inquires about laser therapy to treat red spots that have popped up. On evaluation, the patient is found to have a platelet

disorder called Idiopathic Thrombocytopenic Purpura (ITP). Another example is someone presenting a persistent pimple that when evaluated is not a pimple but an early skin cancer.

Dr. Felice has seen all of the above and stresses the need for medical supervision in all medspa type treatments. This holds true for skin care products and nutritional supplements.

Has the facility offering you these products performed the due diligence necessary? Dr. Felice has and feels that SkinMedica and Pure Encapsulations pass the test. Both are produced from the highest quality materials and are reasonably priced. In addition, you can purchase your skin care products and nutritional supplements on our website utilizing the online store.

Go to www.youthfulimages.com or call 860-242-0505 for assistance.

Dr. Felice's Youthful Images Comparison Chart

Treatments tailored for the appropriate condition

While there are many claims by facilities that promise results, experts in this field of medicine know many of them can't deliver. Yet we see patients everyday that were charged large sums of money for little to no result. In addition, there was no education with regard to supportive or maintenance care. Imagine buying a new car and never washing or waxing the finish.

When you look at your skin in the mirror, you should determine what bothers you. This will help determine what treatment would be most appropriate. You can use the **3 T's** for this: **Tone**, **Texture** and **Tightening**.

Tone would represent the blotchiness of the skin or the reds and browns. You may have a history of sun damage or acne that has left red patches, spider veins or dark spots. Possibly pregnancy or hormonal changes have left you with hyperpigmentation or the so called "Mask of Pregnancy", melasma. In most instances, the Intense Pulsed Light Laser combined with the ndYag laser would be used to even the tones. In the case of active acne, the Acne Photoclearing System would be used to clear the acne first.

Texture can be evaluated by looking at pore size, scars, wrinkles or just a generalized dullness to the skin. Depending on the severity of the condition, one may benefit from micro-

prevage[®] MD

anti-aging treatment

Correct and Protect Your Skin with most powerful anti-aging topical treatment.

- Reduces the appearance of fine lines and wrinkles
- Improves the overall appearance of your skin texture and tone.
- Leaves skin immediately smoother and softer upon application.
- Helps to maintain longevity of skincare treatments.

dermabrasion, Photorejuvenation, No-Needle Mesotherapy, Active FX laser resurfacing, Max FX laser resurfacing or a combination of the above.

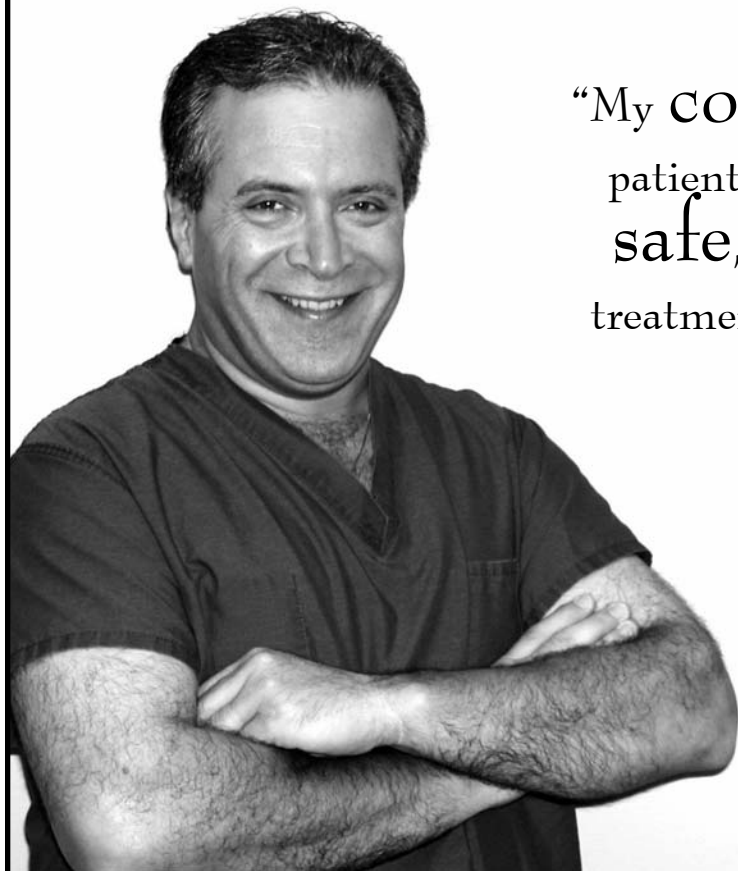

Finally, the last "T", **Tightening**. Loss of elasticity is a greater challenge to correct non-surgically. Most of the misleading information comes with this condition. There is a limit to what any procedure can do for tightening. The most publicized procedure currently is Thermage. This system uses radiofrequency to encourage tightening through heating the skin. Usually, one treatment is required however, patients have reported that it

is very painful, requires sedation and the results were disappointing. Another system is Fraxel which utilizes the properties of Erbium to ablate the surface layers of the skin. It does not produce heat, which causes skin contraction, and is therefore very limited for skin tightening. Systems that both ablate and heat the skin like the Active FX and Max FX have a greater potential for skin tightening in addition to improving texture. In addition, the use of transdermal radiofrequency by Aluma is not painful and effective for skin tightening in various parts of the body.

Take a look at the Referral Reward Program insert to find out how you can earn great gifts just for sending your friends a free gift of beauty. Because we'd much rather reward you than pay for expensive advertising or marketing. Thanks so much for thinking of our practice.

Stay well and look great,
Patrick R. Felice, M.D.

Referral Reward Program

- give a gift of 50% off and get a gift for 50% off

Everyone can benefit from regular skin care treatments. So why not share your beauty secrets with your friends and family and reward yourself at the same time by participating in Dr. Felice's Youthful Images Referral Reward Program. You will earn valuable discounts for every new skincare patient you send to us.

Here's how it works:

Just cut out the valuable certificate below, write in your name in the space that reads "Compliments of" and give the certificate to a friend, neighbor or colleague who has never been to our office.

This certificate entitles them to a 50% savings on a Parisian Peel - medical microdermabrasian treatment (regular value is \$115). Once they use the certificate we'll send you a certificate for **50% off your next Photorejuvenation with DermaWave Mesotonification treatment** (regular value is \$425) or **Parisian Peel with DermaWave** (regular value is \$275).

580 Cottage Grove Road
Suite 103
Bloomfield, CT 06002
