MINT lift® for face lifting

Minimal Invasive Non-surgical Thread

What is MINT lift®?

MINT lift®, is a safe and effective molding PDO thread to lift soft tissues in sagging skin, has gotten approval by CE, FDA and Korea FDA(MFDS). It is minimal invasive treatment without scars and trauma, back to daily life right after the procedure.

Human tissue is consisted of 3D structure thus hard to expect to see great result with a thread unless it has 3D helical type of barbs whereas MINT lift®, has 360° degree of helical barbs around the threads has been secured by Patent Act, creates strong pulling effect and fixing the facial tissue in various directions effectively. This is what makes MINT lift® special.

Approved as Facial fixation lifting thread
[Act 16-436]

FDA 510(k) cleared

* MINT has been proven as registered in USA FDA, 2012.

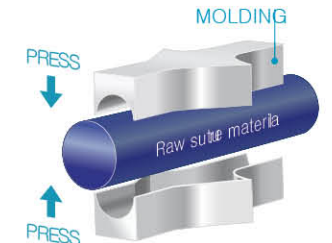

PATENTED TECHNOLOGY Patented Helical Molding Structure

International Patent Applications in 10 Countries
(Patented No. Act CPCTP11 – 0007)

PDO thread with 360 helical barbs to maximize the lifting effect.

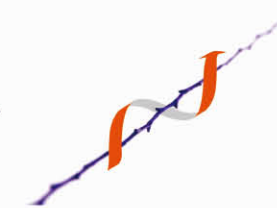

PDO thread manufactured from a press molding technology to make barbs with high tensile strength.

Helical Barbs | 360 DEGREE HELICAL TYPE BARBS

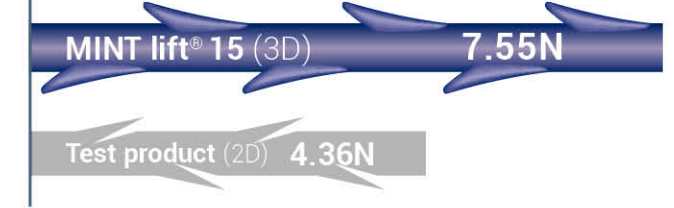

As it has 3D structure, it strongly tightens sagging skin with long lasting effect. MINT lift® has 360 degree barbs on a thread in 3D structure.

Cross Section

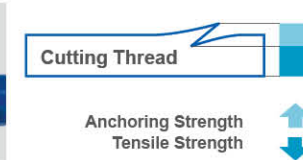

Whole Section

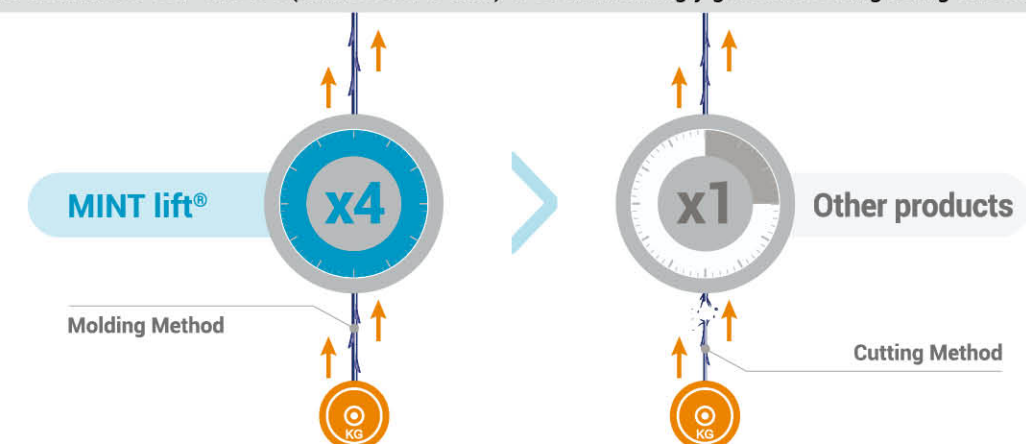

Maximum Strength of 3D(MINT lift®) & 2D Product

Molding Method | ANCHORING STRENGTH & TENSILE FORCE

MINT lift®, was designed to increase tensile strength without damage to a thread.

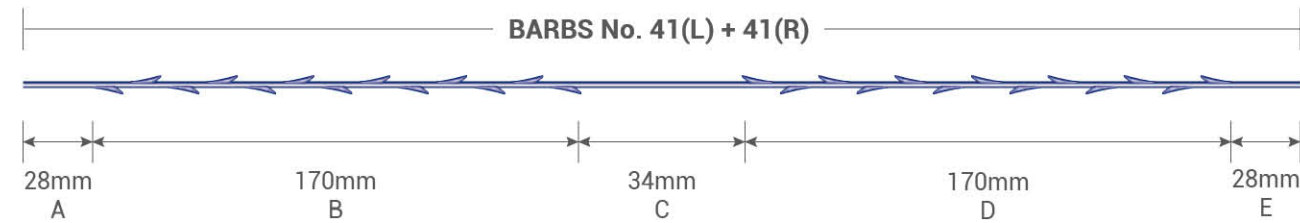

MINT lift® is made of USP size 1-0(diameter 0.40 mm) to overwhelmingly generate strong lifting effect.

MINT lift® Specification

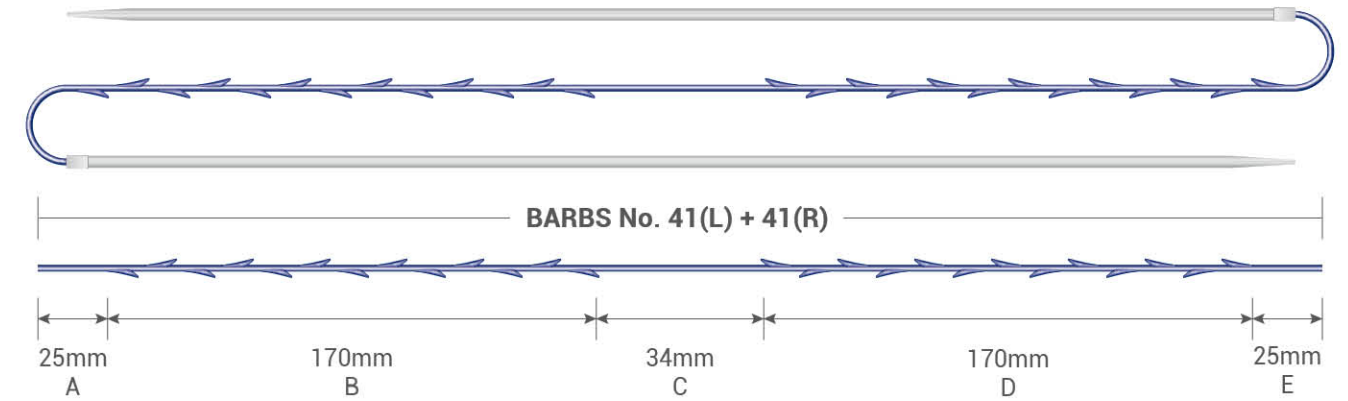

MINT Lift
43cm

MINT lift 43cm	
Material Type	Polydioxanone
PDO Length	43cm
USP Size	USP 1-0
Package	2 threads in a box
Cannula Gauge	Temporal needle & Double blunt cannula
Cog Design	3D Type, 360° Helical Bi-directional Cogs / U shape
Indication	Jaw, Middle face, Nasolabial lifting, etc

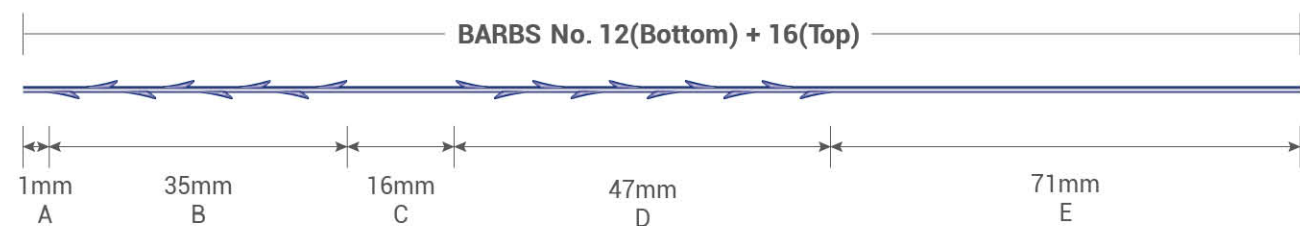

MINT Lift
EASY 43cm

MINT lift 43 EASY	
Material Type	Polydioxanone
PDO Length	43cm
USP Size	USP 1-0
Package	2 threads in a pouch
Needle Gauge	19G / 130mm
Cog Design	3D Type, 360° Helical Bi - directional Cogs /U shape
Indication	Jaw, Middle face, Nasolabial lifting

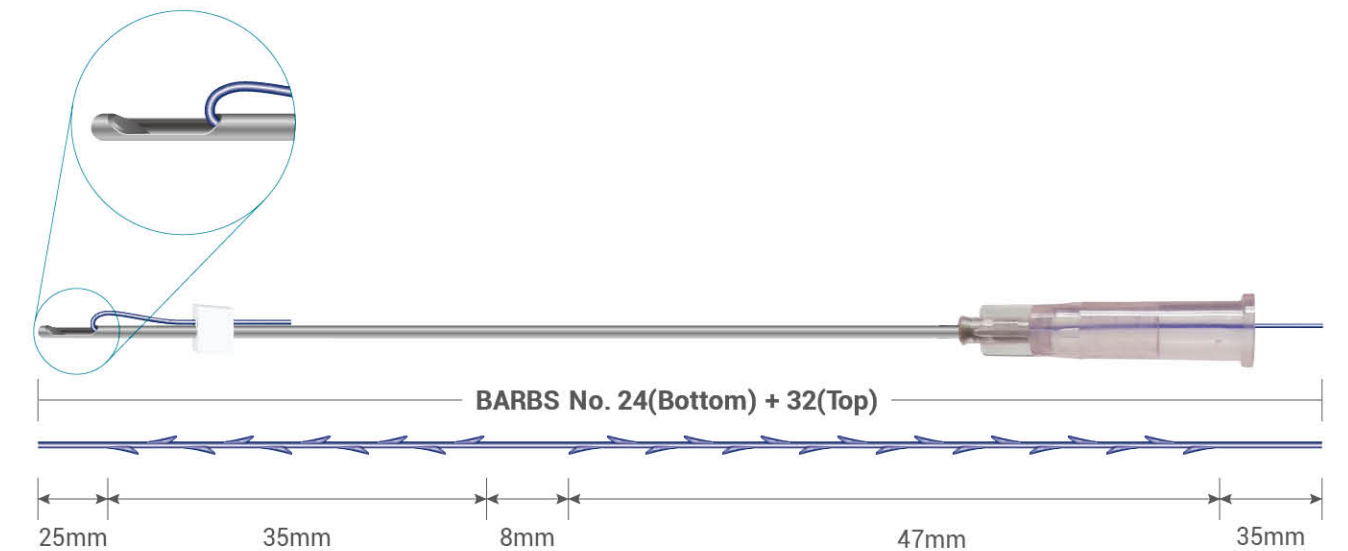

MINT Lift
MINI 17cm

MINT lift 17 MINI	
Material Type	Polydioxanone
PDO Length	17cm
USP Size	USP 1-0
Package	2 threads in a box
Needle Gauge	17G
Cog Design	3D Type, 360° Helical Bi-directional Cogs
Indication	Nasolabial lifting, Jaw line, etc

MINT Lift
FINE 15cm

MINT lift 15 FINE	
Material Type	Polydioxanone [PDO]
PDO Length	15cm
USP Size	USP 2 - 0
Package	4 threads in a pouch, 5 pouchs in a box
Needle Gauge	18G / Cannulated thread
Cog Design	3D Type, 360° Helical Bi - directional Cogs
Indication	Eye brow lifting, Nasolabial, Neck, Neck lifting
