07 Relief for Red Skin

Formulated to calm sensitive, irritated skin and reduce visible redness, Redness Relief CalmPlex from SkinMedica is a non-prescription topical lotion that seeks to address the underlying causes of facial redness, scaling and inflammation. Rather than cover erythema, the calming lotion features vitamin B3 to increase collagen production, and jojoba oil and squalane to enhance the skin's moisture content for improved skin tone. Contact: 866.867.0110, skinmedica.com.
